- ⚠ Never use electrical garden equipment in wet conditions.
- ⚠ Wear strong shoes/boots when mowing to avoid injuries to feet.
- ⚠ Ensure your lawn is free from stones and other debris. Flying stones can break glass or hurt bystanders.
- ⚠ Always switch off and unplug electrical garden equipment before checking, adjusting, lifting or cleaning. Only clear grass from blades when the power supply is switched off.
- ⚠ When mowing a lawn, ensure children are kept at a safe distance.
- ⚠ An RCD (Residual Current Device) circuit breaker is a must when using mains electrical products outdoors. This device instantly detects surges in power when cables are damaged and cuts the power supply. A potential life saver.

...because there is more to life than just gardening.

At Qualcast we have a range of equipment to help you keep a neat and tidy lawn with remarkably little effort.

Whatever the size or style of your garden, Qualcast have the lawncare equipment you need to do the job quicker and easier. And with a "greener" garden in mind, it's good to know that our products have been carefully designed to keep energy consumption and noise levels down.

**Qualcast quality** When you buy Qualcast, you can rest assured you're investing in one of the leading names in British garden equipment, and for total peace of mind, every Qualcast electric product comes with a free five year parts guarantee.

**The environment** Our efforts in recycling, education, energy efficiency and the development of "greener" products have resulted in many awards including BS EN ISO 14001, the International Environmental Management Standard. If you'd like more information about the Qualcast range, please "surf the turf" and see our website at [www.qualcast.co.uk](http://www.qualcast.co.uk) or visit your local DIY or hardware store.

## Which is the right mower for you?

Choosing the right lawn mower is very important and we can make it easy for you.

The first consideration is: **How big is your lawn?** Try this rough Stride Guide to find out your lawn size assuming an average person's stride is half-a-metre. **Small** lawns can be around 10-20 strides across, **Medium** lawns may be 20-30 strides, whilst **Large** lawns and paddocks would be 30 or more strides across.

**What power source?** Typically, for smaller lawns, hand-push or light mains electric-powered mowers are popular. For medium lawns, our range of mains electric products will do the job nicely, whilst petrol-powered mowers are a favourite for large lawns and paddocks. Alternatively, you can still use a larger mains electric mower such as the Power-Trak 400, new for 2003.

## What does it all mean?

**CYLINDER MOWERS** – Use a horizontal cylinder of blades cutting against a fixed bottom blade for a superior scissor-like cut.

Qualcast have 80 years of experience in producing top quality cylinder mowers. This cutting system produces the finest cut, and the electric cylinder mowers are lightweight and easy to use.

Electric cylinders are the most energy efficient of all cutting systems which is why they have smaller motors than rotary or hover. They are all fitted with rear rollers to leave a "striped" effect on your lawn.

Cylinder mowers are the only mowers to have on-cut adjustment, whereby you can affect the quality of cut by adjusting the clearance between the cutting cylinder and bottom blade. Setting the blades to just "kiss" will give a neat, clean cut; too far apart and the grass is ripped, or not cut at all.

**ROTARY MOWERS** – Use a high speed rotating blade giving a "slashing" action to cutting. This and a combination of wheels or rollers produces strong mowers for cutting longer grass effectively.

This cutting system comes in mowers of varying sizes to suit all sizes of lawn. Qualcast's new range of rotary mowers features the PowerDrive™ system, hi-torque motors which deliver extra power when required and copes with even longer grass effortlessly.

**HOVER MOWERS** – Use a high speed rotating blade (similar to rotary) to cut the grass and a fan to supply a cushion of air on which the mower floats for manoeuvrability. They are best if no grass collection is involved as they can become more awkward to use when collecting. They also require higher powered motors to attain "lift" and hence are the least energy efficient of all the cutting systems.

Qualcast's hover mowers, the Easi-Lite 28 and 34, are the world's first hover mowers to feature the "easi-steer" facility – a pivoting head making it easy to mow even small areas of lawn without damaging nearby flower beds and shrubs.

**HEIGHT-OF-CUT ADJUSTMENT** – Allows you to change the finished length of the grass on your lawn. It is desirable during hot weather to leave the grass a little longer or cut down in stages if your grass is very long. The height-of-cut adjustment gives you these options.

**CUTTING WIDTH** – The longer the blade the wider the cut; the wider the cut the quicker the job. You need to strike a balance; bigger mowers cost more but reduce the amount of work. If you have a smaller lawn the manoeuvrability of a smaller mower may be more desirable.

# Welcome to Qualcast

Whatever your needs Qualcast has a range of quality lawncare equipment to complete the task quickly, easily and safely so you can relax and have fun in your garden.

Choose from a range of hand, electric and petrol-powered mowers to find the product best suited to your needs.

All Qualcast electric products come with a free five year parts guarantee (including motor) to give you added peace of mind and reassurance.

**S** Small lawns – 10-20 strides across

**M** Medium lawns – 20-30 strides across

**L** Large lawns – 30 or more strides

**Lawnraker**

## s Panther 30

The UK's best-selling hand mower.

- 30cm blade width
- Variable cutting heights for convenient mowing: 12mm – 40mm
- Light and compact for easy storage
- Rear-mounted grass box – gets right up to the edges
- Ideal for small areas remote from a power supply
- Two year guarantee

## s Easi-Lite 28

The 3D steerable hover mower with pivotal head.

- 28cm blade width
- Two cutting heights: 20mm and 30mm (tool free adjustment)
- 1000 Watt motor
- Cable length: 10m (32ft) with fitted plug
- Two-way pivoting head easily steers around your lawn
- Polyamide safety blade – won't cut the cable
- Fold-down handles for easy storage
- Lightweight – only 5.2kg
- Five year parts guarantee

## M Concorde 32

Concorde, the World's best-selling electric mower.

- 32cm blade width
- 'Quattro-cut' four-blade cutting cylinder
- Flexible height-of-cut range 12mm – 42mm
- Energy efficient 325 Watt motor
- Full width rear roller for stripes
- Tool-less assembly
- 'Z' fold handle for compact storage
- Cable length: 12m (40ft) with fitted plug
- Five year parts guarantee

'Z' fold handle for compact storage.

# The new Kings of the Jungle

A range of rotary mowers fitted with new hi-torque PowerDrive™ motors to suit every size of garden. Maximum power from the moment the start lever is pulled, plus extra power in reserve to cut and collect in even the most testing of conditions.

## M Easi-Trak 32

Powerful and lightweight electric rotary mower.

- 850 Watt PowerDrive System™ Hi-Torque motor
- 32cm blade width
- Three heights-of-cut: 20mm – 60mm
- Fold-down, height adjustable handles
- Lightweight and easy to carry at only 7.4kg
- 28 litre rear collect grassbox
- 10m (32ft) cable with fitted plug
- Five year parts guarantee

## M Power-Trak 34

Compact, powerful and manoeuvrable electric rotary mower.

- 1200 Watt PowerDrive System™ Hi-Torque motor
- 34cm blade width
- Single lever height-of-cut: 20mm – 70mm
- Fold-down, height adjustable handles
- Integral rear roller for striped lawn
- Lightweight with "easi-carry" handles – only 12kg
- Large 40 litre rear collect grassbox
- 12m (40ft) cable with fitted plug
- Five year parts guarantee

## M Elan 32

A rear collecting electric cylinder mower.

- 32cm blade width
- Flexible height-of-cut range 12mm – 42mm
- Energy efficient 350 Watt motor – saving you money
- Full-width rear roller for stripes and stability
- Cable length: 15m (49ft) with fitted plug
- Easily accessible 31 litre rear collect grassbox allows mowing right up to walls and under bushes
- Folding handles for compact storage
- Five year parts guarantee

More mowing, less emptying.

## M Classic Electric 30

The cylinder mower for a fine cut and classic stripes.

- 30cm blade width
- Five pre-set cutting heights for quick adjustment: 10mm – 35mm (plus scarifying)
- Energy efficient 340 Watt motor
- Cable length: generous 22.5m (75ft) with fitted plug
- Steel rear roller for classic striped finish
- QX™ scarifier cassette available as optional extra – for easy conversion to a powered lawn rake, essential for a healthy lawn
- Five year parts guarantee

Steel rear roller for classic stripes.

## M Cobra 32

The quiet, easy-to-use electric rotary mower for excellent clean cutting performance.

- 32cm blade width
- One-touch "Easi-squeeze" height adjustment
- Maximum flexibility with seven cutting heights: 18mm – 65mm
- 1000 Watt induction motor
- Cable length: 12m (40ft) with fitted plug
- 35 litre grass box with anti-clog chute
- Integral rear-roller for stripes
- Five year parts guarantee

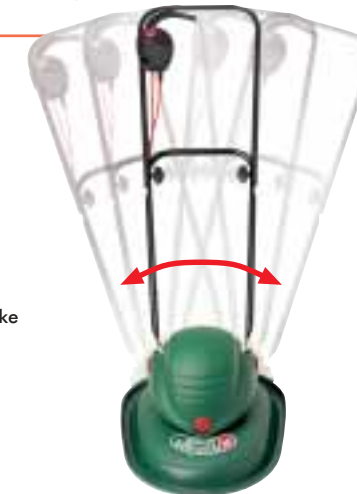

only 75 decibels

## M Easi-Lite 34

The 3D metal bladed steerable electric hover mower with pivotal head.

- 34cm blade width
- Four cutting heights: 10mm to 32mm
- 1150 Watt motor
- Cable length: 12m (40ft) with fitted plug
- Two way pivoting head easily steers around your lawn
- Hardened steel blade and integral blade brake
- Fold-down handles for easy storage
- Lightweight – only 7.4kg
- Five year parts guarantee

# NEW for 2003!

## L Power-Trak 400

Compact, powerful electric rotary mower that tackles the toughest conditions.

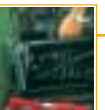

- 1700 Watt PowerDrive System™ Hi-Torque motor
- 40cm blade width
- Single lever height-of-cut: 20mm – 70mm
- Fold-down, height adjustable handles
- Integral rear roller for striped lawn
- Lightweight with "easi-carry" handles – only 12.6kg
- Smooth running rubber coated wheels
- Large 50 litre rear collect grassbox
- 12m (40ft) cable with fitted plug
- Five year parts guarantee

## L Classic Petrol 35s

The powerful self-propelled petrol cylinder mower.

- 35cm blade width
- Five pre-set cutting heights for quick and easy adjustment: 10mm – 35mm and one for scarifying
- 148cc petrol engine – runs on unleaded petrol
- Front grass box for easy collection
- Three-way drive system allows easy mowing
- Removable QX™ cassette system for easier maintenance. Lawnraker cassette available as optional extra for easy conversion to a powered scarifier.
- Three year parts guarantee

Optional QX™ scarifier cassette

## Lawnraker 32

Light and easy to use electric lawnraker for a healthy lawn.

- 32cm raking width
- Specially-designed large capacity grassbox reduces emptying time
- 'Z' fold handle for compact storage
- Cable length: 12m (40ft) and fitted plug
- Seven raking heights, -3mm to 27mm
- Metal 'Powerflex' tines easily remove moss and thatch
- Five year parts guarantee

'Z' fold handle for compact storage.
